*in collaboration with*

## NATIONAL FORENSIC SCIENCE UNIVERSITY, TRIPURA CAMPUS

*Presents*

**Workshop On:**

**Forensic Evidence and Indian Criminal Justice System**

Prof. (Dr.) Yogesh Pratap Singh  
Vice-Chancellor, National Law  
University Tripura

Prof. (Dr.) H. K. Pratihari  
Director, Tripura Campus, NFSU

### ABOUT THE WORKSHOP:

This workshop offers an in-depth exploration of forensic science as it intersects with the criminal justice system. It is designed to provide participants with a foundational understanding of how forensic evidence is identified, collected, preserved, and presented in legal proceedings. Through a structured academic approach, the workshop will cover essential topics including crime scene management, evidence handling protocols, laboratory analysis techniques, and the scientific principles underlying various types of forensic evidence, such as biological, chemical, and digital traces.

Participants will be engaged with key legal frameworks governing the admissibility and reliability of forensic evidence in courtrooms. The sessions aim to foster critical thinking about the role of scientific methods in criminal investigations and trials, as well as the challenges posed by evolving technologies. The workshop also emphasizes the ethical responsibilities of professionals involved in forensic processes and encourages a multidisciplinary perspective that integrates law, science, and procedure. This initiative serves as a platform to enhance both theoretical understanding and practical insight.
